

## Pacifica Spa Series - XL 30

### XL 30

Aqua Sun Ozone International's XL 30 is smallest unit in the Pacifica Pool and Spa Series. This Corona Discharge ozone generator is used for residential spas. In addition to the advantages of Corona Discharge ozone technology, the Pacifica Pool and Spa Series saves money because the Corona Discharge cell uses less energy (no lamp, ballast, or starter) than an ultraviolet generator and cost less to replace.

Patent Pending

### Specifications

- Power Input: 120V
- Dimensions: (H) 3.0 " (W) 2.75 " (D) 1.25 "
- Check Valve: Single Check Valve Design
- Weight: 10 oz.
- Filter: EMC Filter
- Ozone Output: 50-80 mg/hr adjustable

### Warranty

One Year

### Ozone is Convenient in Spas

- Ozone does not have to be purchased or stored. Ozone is generated "on site" and is introduced into the water automatically.
- Ozone does not affect the pH balance of water, thus minimizing pH adjustments.
- Ozone helps reduce total dissolved solids in water so that the water does not have to be changed as often.
- Ozone eliminates much of the routine maintenance because it does such an effective job keeping the water clean.
